

At MediCorp we are in the business of providing healthcare services. For nearly two decades our teams of medical professionals have been delivering quality care based on **international standards** and **best practice**. We combine modern **medical technology** and **remote medicine proficiency** paired with **industry knowledge** to support customer's healthcare requirements. Our hands-on experience of operating in **challenging and complex environments** sets us apart.

We enable our customers to focus on their business whilst we support them in meeting **legislative**, **continuous operations** and **budgetary objectives**. Allow us to take care of your most valuable asset, your employees, whilst you take care of your business.

### What we offer as Topside Assistance :

- **Medical Advice:**  
Includes consultations with actively practising, board-certified emergency and specialist physicians.
- **Dedicated case co-ordinator:**  
A Medical Coordination Specialist coordinates, tracks, and documents every aspect of each case using the latest electronic medical record system software.
- **Medical Facility Referrals:**  
Combining our own experience with key medical and security intelligence partners, we provide referrals to vetted global medical and dental facilities.
- **Global Evacuation Coordination:**  
If the need for an evacuation arises, MediCorp coordinates every step through our network of ground and air transportation providers and medical facilities. Our experts assess and manage the situation to help you prevent expensive and unnecessary evacuations.

### How we offer our Topside Assistance :

- World-class medical advice and resources to any location in the world at any time
- Accessible by phone, email, secure video chat software, or telemedicine device
- Our service is specifically designed to direct the onsite medical treatment of personnel working on a project or at a specific site
- Additional Telemedicine devices are also available based on individual client requirements
